Everything you need in one convenient Service, Maintenance & Repair programme

Consistency

We'll map your pump to either our service centre, a mobile Trebles engineer, or an approved partner, so you can be sure the work will be done to one consistently high standard.

Convenience

Avoid multiple service providers and streamline your pump system maintenance. Trebles can handle all aspects of pump service, maintenance, and repair in a single appointment, minimising downtime and maximising efficiency for your operations.

Fast Response

No need to wait for those urgent repairs. With our service centre, a dedicated network of mobile engineers, and a list of approved partners, we promptly prioritise your pump system needs. Our scheduling flexibility ensures swift response times without compromising on quality.

Flexibility

Sometimes it isn't always convenient to get your pump to our service centre. No problem - our mobile engineers and approved partners bring the expertise directly to you. Whether at a construction site, industrial facility, commercial building or elsewhere, we ensure your pumps receive professional attention wherever they're located.

High Standards – Guaranteed

Our service centre is equipped with the latest well-maintained equipment and work is carried out by skilled engineers operating to Original Equipment Manufacturer (OEM) standards. Whether it's a centrifugal, submersible, or other pump type, we ensure thorough maintenance and repair.

Setting you up on the right foot

Trebles provides tailored installation and commissioning services for a wide range of pump systems, from single units to complex plant room setups. Our expert engineers ensure peak performance and efficiency, collaborating closely with site teams to optimise operations and minimise downtime.

We excel in onsite installations and system rebuilds, accommodating project constraints and delivering seamless solutions nationwide. For large-scale projects, Trebles can offer customised commissioning packages across the UK, ensuring comprehensive support throughout the project lifecycle.

We've got it all covered:

- Customised installation & commissioning
- Complex pump system commissioning & installations
- Close collaboration for seamless project integration
- State-of-the-art equipment & OEM standards
- Swift response and scheduling
- Flexible packages adapt to project scopes & timelines
- Nationwide coverage

Maintaining the flow, wherever you are

We pride ourselves on providing exceptional service, maintenance, and repair solutions across the entire UK. No matter where you are located.

With a strategically located service centre and a fleet of skilled engineers, we ensure that help is always within reach. Your equipment deserves the best care, and we're committed to delivering a timely, efficient, and reliable service, no matter the distance.

Our comprehensive nationwide coverage means that you can trust us to keep your operations running smoothly, without interruption. Whether it's an upcoming service, routine maintenance, or emergency repair, our team is equipped to handle all your needs.

We've got your Water Systems covered

We're dedicated to ensuring that your water systems, whether for clean or dirty water, remain efficient and reliable. Maintaining water systems is crucial for public health and environmental protection. Our expert team of engineers are equipped to handle all aspects of service, maintenance, and repair to keep your systems in optimal condition.

Clean Water Systems

We offer comprehensive services for clean water systems, ensuring safe and reliable supply for residential and commercial applications. Our services include expert installation of pumps and filtration systems, regular maintenance to enhance performance, and quick repairs for issues ranging from minor leaks to major failures.

Dirty Water Systems

Our expertise in dirty water systems is essential for industries like construction, agriculture, and waste management. We handle the installation, maintenance, and repair of dirty water pumps, design effective drainage solutions to prevent flooding, and support wastewater management with routine servicing and emergency response.

The Importance of Regular Maintenance

Maintaining both clean and dirty water systems is vital for health, safety, and environmental reasons. Well-maintained systems reduce the risk of contamination, ensure efficient operation, and extend the lifespan of the equipment.

Regular service and timely repairs prevent minor issues from becoming major problems, ensuring uninterrupted service and compliance with all regulatory standards.

Assessing Every Spatial Challenge

Safety is our top priority, and our certified engineers are proof of that commitment. Trained to meet strict regulations for working at heights and in confined spaces, our team is equipped to tackle any job with confidence. Whether it's scaling tall structures or navigating tight spots, we ensure that every project is executed safely and efficiently.

Our engineers undergo rigorous training and certification processes, so you can trust that they have the skills and knowledge to handle any situation. With a focus on best practices and safety protocols, we're dedicated to delivering an exceptional service while keeping our team and your site secure. When you choose Trebles, you're choosing a partner that values safety as much as you do.

For when the unexpected happens

Sometimes, despite best efforts, products will occasionally fail. Trebles service engineers can quickly assess if the product faults are covered under the supplier's warranty.

Emergency Breakdown

When an emergency breakdown hits, Trebles has your back. Our expert engineers are ready to jump in, assess the situation, and get things fixed quickly to keep your downtime to a minimum. With our quick response times and advanced diagnostic tools, we'll have you back up and running in no time.

Warranty Support

Products fail. When they do, you need a quick solution.

Our service team can quickly check if a warranty claim is valid, often avoiding unnecessary returns to the manufacturer and saving you time and money. If it's a Trebles product, our service and production team work alongside one another, so we can provide a quick and effective solution.

Economic Repair

When a product is outside of its warranty period, economic repair is essential for keeping costs down, and that's where we come in. Our engineers can break down the issue and give you the details you need to decide whether to repair or replace your pump.

If a repair is the best option, we've got you covered. We handle everything from assessing the problem and safely removing the equipment to refurbishing or replacing components. Plus, every repaired unit is fully tested before we return it to you, ensuring it works like new.

We're committed to keeping the flow

Not only is Trebles one of the UK's largest independently owned pump distributors and fluid circulation specialists, but we're also one of the most trusted. And we're passionate about great customer service. With our unwavering support to call upon, you can minimise the cost of pump ownership, maximise productivity, reduce emissions and control compliance responsibilities. This not only makes your business more profitable, but it makes everyone's job less taxing too.

With a network of multi-skilled mobile engineers and approved partners nationwide, plus an outstanding service centre, you can be sure we've got the resource to provide pump service, maintenance and repair of various pump applications and sizes.

Trusted by the biggest and the best

From small pumps to large plant rooms, we can offer specialist support to any business with pump requirements. But don't just take our word for it. We're already trusted by some of the UK's biggest and most well-known companies.

Some of the key sectors we support include:

Water Management

Agriculture & Irrigation

Oil & Gas

Chemical & Pharmaceutical

Building Services

Food & Beverage

About Trebles

Trebles is the leading independent distributor, offering manufacturing and service capabilities backed by over 55 years of experience in the pump industry.

We are Trebles.
We're committed to keeping the flow.

What we do

Established in 1966, Trebles is the UK's largest independent pump distributor with manufacturing and service capabilities. With over 55 years of expertise, Trebles boasts technical knowledge spanning over 50 suppliers and 500 years of combined experience. Holding over £3.5 million in stock, including its branded products like EcoBoost and EcoBoost+ booster sets, Trebles ensures quick nationwide delivery from its branches in Wolverhampton, Derby, and Uxbridge. Offering bespoke solutions like packaged plantrooms and skids, along with comprehensive service and commissioning options, Trebles delivers unparalleled support and innovation to its customers across the UK.
