

# Fluid Solutions

The Trebles Offering

# Who are Trebles?

Established in 1966, Trebles is the largest independent pump distributor with manufacturing and service capability in the UK.

## Reliable

Trebles understand deadlines and deliver promptly with a vast stockholding

## Technical Experts

Over 50 years knowledge base, built through long-standing and expansive technical sales teams

## Approachable

Trebles provide consultative and supportive technical advice with a human touch

## Distribution

### Huge Stock Holding

Holding in excess of £3.5m in stock, we ensure quick delivery to sites in the UK based on extensive product knowledge.

## Complete Bespoke Solutions

### Packaged Plant Rooms & Skids

Trebles' manufacturing and engineering department consistently delivers custom-packaged plant rooms and skids directly to job sites, with a team of design engineers capable of accommodating any size or unique requirement.

## Unrivalled Expertise

### Technical Knowledge

For 50+ years, Trebles has amassed extensive knowledge, collaborating with over 50 suppliers. The team's expertise spans diverse fluid circulation products, totalling over 500 years of pumping experience across domestic, commercial, and industrial equipment.

## Trebles' Branded Products

### Product Innovators

Trebles proudly designs and manufactures its in-house range, complementing products from strategic suppliers like Grundfos, Wilo, and Lowara. Explore the 'Manufacturing' section for details on innovations such as the EcoBoost and EcoBoost+ booster sets and the Trebles Pressbox.

## The Full Package

### Service & Commissioning

We offer a complete range of services, including breakdowns, commissioning, maintenance, and repairs throughout the UK. With a team of engineers, and a substantial spare parts stock, Trebles ensures prompt pump repairs, regardless of age.

## Multiple Branches & Localised Support

### National Reach

Beyond the Wolverhampton distribution centre, Trebles has static flagship locations in Derby and Uxbridge, providing same-day local delivery. The extensive national support extends beyond physical locations, featuring one of the largest on-the-road sales and account management teams.

# Product Offering

As the UK's largest independent pump specialist, with over £3.5m worth of stock holding, Trebles will have a product to cater to every requirement.

## Energy Saving

Prioritising energy-efficient products to help save the planet and your wallet

## Cost Saving

Product recommendations based on suitability, not necessarily the highest price

## 50 Years Knowledge

Extensive technical expertise covers all pump brands, both new and old

## Pumps

Trebles holds key distributor status with leading pump manufacturers, such as Grundfos, Lowara, Wilo, Flamco, Varisco, Mono, Dab, Ebara, KSB, and more. From circulators to submersibles, Trebles stock a comprehensive range.

## Complete Systems

From a single packaged pressurisation unit to a complete packaged plant room, Trebles leverages its extensive stock and manufacturing facility to provide the right solution for any requirement.

## Vessels

Trebles stock sizes ranging from small domestic to large industrial applications, featuring leading brands like Flamco, Reflex, and Zilmet. The range includes heating expansion vessels, potable pressure vessels, and flow-through vessels.

## Accessories & Spares

Trebles stocks an extensive range of spares and accessories to prevent delays and inconvenience caused by the need for even the smallest parts. Beyond pump units, Trebles offers comprehensive support.

## Did you know?

Trebles holds in excess of £3.5m worth of stock within the UK.

# Pump Distribution

We recognise the pivotal role that pumps and associated product sales play, especially in the Building Service and Industrial sectors.

## Building Services

Trebles proudly take the lead in innovation and efficiency with exceptional pump solutions. Serving as the linchpin, we enhance functionality across various building services. By providing customised solutions that elevate structures, Trebles address the unique demands of the sector, upholding the highest industry standards.

## Industrial Applications

Trebles demonstrate excellence by providing precision and reliability through advanced pump solutions across a range of industrial applications. Our pump performance facilitates efficient factory operations, optimising various processes.

Trusted by the Best

# Servicing

To back up Trebles' expansive product sales offering, the business also operates a dedicated service department providing system commissions, product servicing, along with warranty and breakdown.

## Dual Workings

Close working with your on-site engineers

## Technical Expertise

Built from over 50+ years pump experience

## Quick Turnaround

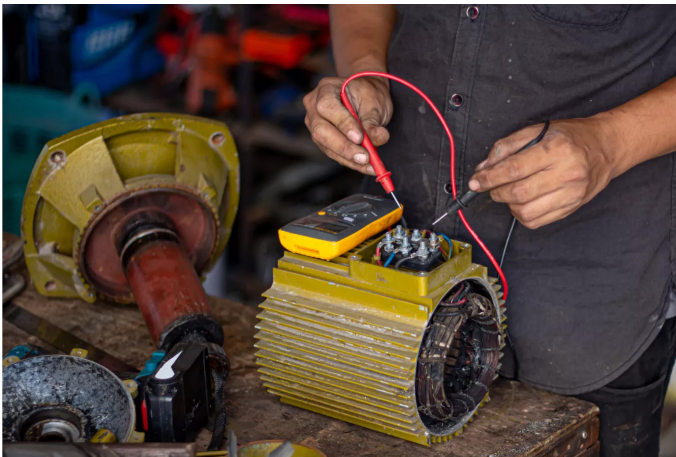

On-site when you need us

### On-Site Install System Commissions

Trebles goes beyond product delivery, providing the option to work with your engineers for installation or offer full commissioning services tailored to your requirements. Whether it's a single pump, bespoke booster, or a complete packaged plant room, Trebles can offer it all.

### Prolonging Product Life Product Servicing

Certain products benefit from extended maintenance through planned and preventative measures. Trebles provide routine maintenance contracts either on an annual or biannual basis to meet customer needs.

### For When the Unexpected Happens Warranty & Breakdown

Despite best efforts, products can fail. Trebles' service engineers promptly assess if faults are covered under the supplier's warranty. For out-of-warranty items, economic equipment repair is crucial to cost management. Trebles engineers provide detailed assessments for informed customer decisions.

# Manufacturing

Backed up by a team of design engineers, the Trebles manufacturing department are able to cater for a huge array of requirements – no matter how big, small or unique.

## Trebles' Flagship Products Booster Sets

For over 30 years, Trebles has crafted reliable booster sets in the Midlands, offering premium sets, combined booster and tank sets, and the Eco-Boost and Eco-Boost+ ranges. Available in single, twin, and multiple pump configurations.

## Sealed System Pressurisation Units

Trebles' sealed system pressurisation units offer single and twin pump models in both floor and wall-mounted versions. The compact Trebles Pressbox is highly specified, ideal for space-constrained environments.

## Run-Around-Coil Systems RAC Packs

Trebles' Run-Around-Coil Sets are pre-fabricated for sealed cooling systems, used in conjunction with air handling units.

## Tailor-Made – For all Applications Custom Skids

Trebles' popular option offers the benefits of package plant rooms without walls, prioritising a compact footprint to maximise valuable space. Delivered directly to your site.

## Made to Order Bespoke Fabrications

The experienced team at Trebles can manufacture tailored solutions for any commercial need, be it an unusual booster set, restricted space requirement, compatibility with existing pipework, or even all of these challenges.

## Complete System Packaged Plant Rooms

Trebles excels in off-site manufactured packaged plant rooms, collaborating closely with your engineers to design and manufacture a comprehensive system. The 'plug & go' solution encompasses all elements, including equipment, fabrication, pipe welding, cladding, insulation, electrical work, and paint finishes.

### Custom Built to Order Options

Trebles can cater for exact custom needs

### 50+ Years Technical Expertise

Industrial leading, unrivalled technical knowledge

### Consultative Approach

Close workings with on-site engineers

# Bespoke Fabrications

Whether it's an unusual booster set, restricted space requirement, or compatibility with existing pipework, the team at Trebles has decades of experience in manufacturing solutions for any commercial requirement.

## Fully Serviceable

Designed for longevity

## Close Workings

Stakeholders kept informed throughout the entire process

## Energy Efficient

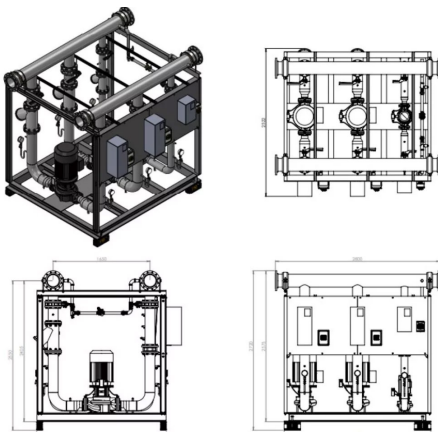

Solutions for long-term cost savings

## Tailor-Made Bespoke Booster Sets

Trebles can provide tailored booster sets to meet specific customer needs, accommodating external applications with weatherproof kiosks or addressing restricted space and special pipework configurations.

## Any Space or Specification The Unusual

Trebles engineers have extensive experience, having encountered various challenges. As most Trebles fabrications are made to order, unique requests are readily accommodated. Whether it involves limited space, unconventional plant room shapes, high flow rates, or the need for zero downtime, Trebles can provide a tailored solution.

## Existing System Compatibility

Trebles recognise that customers prefer practical solutions and that booster or pressurisation units often need to integrate seamlessly with existing systems. Regardless of the product, brand, size, or unique specifications, Trebles can customise its equipment to align with these requirements.

## CAD 3D Design Design Process

Trebles employs cutting-edge software and highly skilled, certified CAD administrators to design bespoke products. Drawings, shared with customers in their preferred format, include various CAD formats, including BIM, throughout the design process.
